Netskope Cloud Security Certification Program

The Netskope Cloud Security Certification Program validates and recognizes your knowledge and skill with the Netskope Security Cloud platform and general cloud technologies deployed to provide a highly scalable and secure cloud-based environment for enterprises across the globe.

Netskope Certified Cloud Security Architect

Netskope Certified Cloud Security Architect is awarded to cloud security practitioners who have successfully completed a 90-minute exam proctored through Pearson VUE, the global expert in test delivery services. This exam and certification award replaces the former Netskope Cloud Security Elite accreditation.

Netskope Certified Cloud Security Architect recognition is valid for two years from the date of the award. The validation is based on the actual date the exam is successfully completed through Pearson VUE. Netskope reserves the right to invalidate a certification at any time the Netskope Cloud Security Certification program agreement is violated.

The Netskope Certified Cloud Security Architect exam is based on the following industry practitioner profile:

> The candidate understands cloud security solutions and the Netskope platform. They can plan and execute a successful deployment of Netskope and set the environment up for ongoing value realization, as required. Successful candidates will have approximately 18 months of practical experience on the Netskope Security Cloud platform, although no requirement is placed on this criterion.
