

# Netskope Integrator Accreditation

The Netskope Integrator Accreditation is awarded to cloud security practitioners who successfully complete a 60-question, 90-minute exam through Netskope Academy. This accreditation replaces the former Netskope Certified Cloud Security Integrator certification.

The Netskope Integrator Accreditation is valid for two years from the date of award, based on the actual date the exam is successfully completed through Netskope Academy.

The Netskope Integrator Accreditation exam is based on the following industry practitioner profile:

The candidate understands cloud security solutions and the Netskope platform. They can implement, integrate, configure, monitor, and perform troubleshooting, as required. Successful candidates will have approximately 12 months of practical experience on the Netskope Security Cloud platform, although no requirement is placed on this criterion.

**The targeted audience for program certifications includes these job roles / types:**

- Security Engineer / Security Architect
- Network Engineer
- Support Engineer
- Security Analyst
- Sales Engineer / Systems Engineer
- Professional Services Engineer / Security Consultant

### This exam focuses on the following topics:
